Integrated IT Solutions

J-Technologies India Pvt Ltd (J-Tech) in association with 7-Technologies, Denmark and Digpro, Sweden offers an integrated web based application to manage the Water Distribution Network, with complete GIS functionalities. The partnership is highly committed to delivering integrated solutions to water bodies, right from the project initiation to end-to-end hydraulic modeling analysis.

## Solutions for Water Distribution Networks

AQUIS is a hydraulic modeling tool which simulates the flow and pressure in your distribution network. Unlike other tools, AQUIS uses real-time data to analyze and track the current situation enabling operators to make better and smarter decisions and to optimize production and enhance your bottom line.

Real-time SCADA data transforms the AQUIS model from a static planning tool into a dynamic decision making tool, integrated in your day-to-day operation and with instant, clearly identified benefits and economic advantages.

**Digpro DP/WaW**  
Water and Waste Water Management

Digpro DP/WaW is a web based network information system for Water and Waste water management and it used to manage all the network assets such as Lines, Pipes, Nodes, Valves, Service Points, Water wells and Sewage lines.

Our products are used on a daily basis by thousands of network

designers around the world and contribute to satisfying the water supply needs for more than 100 million people.

### Major Features

- » Network design
- » Network Documentation
- » Network extension
- » Network model building
- » Model simulation
- » Network Analysis
  - » Hydraulic
  - » Water quality
  - » Surge
  - » Pressure optimization
  - » Pump optimization
- » Cost calculations
- » Bill of Material
- » Material procurement
- » Project management
- » Resource management
- » Contractor's management
- » Deployment
- » Complete maintenance

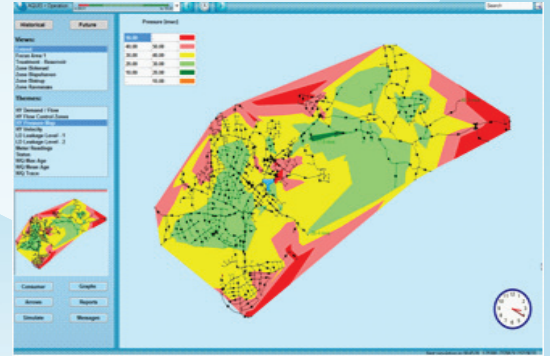

### About 7-T, Denmark

7T is a part of the global corporation, Schneider Electric, with 110,000 employees in 102 countries. Founded in 1984 , with a strong track record of profitable growth, 7-T provide Water Network Management solutions for any kind of water utility, any type of user, and any budget.

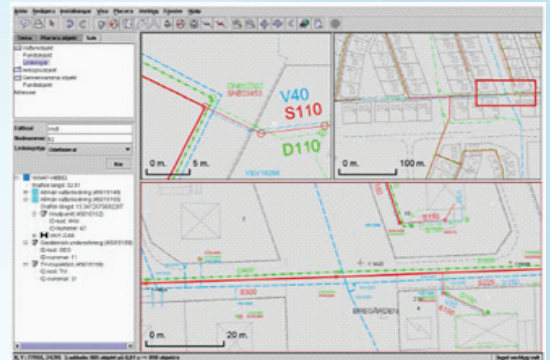

The original AQUIS software solution has been on the market since 1987. AQUIS is in daily operation in more than 1500 cities and supplies clean water to more than 100 million homes.

### About Digpro, Sweden

Digpro develops, markets, and sells its DP/Facilplus suite of GIS based products on a global market with a prime focus on the energy, telecom, utility and government industry sectors. Founded in 1980, Digpro has been in business for more than 20 years and has been profitable every year.

With a market share in Swedish Electricity Distribution network close to 40%, and similar positions in the other Digpro focus areas, Digpro is by far the largest vendor of Network Information Systems in Sweden.

# J-Tech

Integrated IT Solutions

J-Technologies is a part of the Euro €50 million IndoShell Group (www.indoshell .in) a conglomerate with specialized in indigenized auto component manufacturing and serving the top automobile majors (Bosch, BorgWarner, Parker, Piaggio, Eaton, Husco, Lombardini) across the globe.

J-Tech provides integrated IT solutions to our clients to manage their business complexities in today's rapidly changing technological environment with a specialized mix of domain knowledge, technological expertise, quality procedures and service offerings.

To propel your business into the new era, please get in touch with us.
